

# **Parish Online**

Parish Online is a web-based mapping system that can be accessed from any internet enabled computer. It has been designed to help Town and Parish Councils view essential geographic and map based information. West Sussex County Council have funded the implementation of Parish Online across all the West Sussex Town and Parish Councils.

The system is based on a system of electronic Ordnance Survey (OS) maps which then have a multitude of 'layers' that can be selected to overlay the master OS map. Data for these layers have been sourced from organisations such as Natural England, Historic England, Environment Agency, Land Registry, Department of Transport, DEFRA, Post office and Getmapping. The ability to apply and combine these overlays provides a very powerful mapping tool that is bundled into a single easy to use interface.

The Parish Online system also allows individual Councils to create and maintain their own layer for the system and Colgate Parish Council has created a layer indicating all Parish Council assets.

The Parish Online system can be used in read-only mode for free by the public and the Colgate Parish Council Parish Online website address and login details are as follows:

Parish Online Internet Address = <http://gis.getmapping.com/parish-online>

Public User Name = *public@45uf008*

Public Password = *h447y!cf*

Please feel free to explore the Parish Online system using the above login details. If you have any questions about Parish Online please contact the Colgate Parish Council Clerk at
